

DBS Mathematics Department

Dear Parents,

Please be advised that all Middle School students will take a **Math Diagnostic Test** on **Monday March 4th, 2019**. The purpose of this test is to find out the degree to which students have mastered core learning standards and discover students who may benefit from intervention or a more personalized learning. Kindly be informed that this test does not require any preparation as it will assess students' mathematical skills and knowledge at the current grade level. Additionally, the results will provide educators with reliable data to support for future planning for classes and student learning accommodations. This placement test does not affect any grades the student has or will have in math classes.

Thank you for understanding and cooperation.

Sincerely,

Isra Ali
Math Coordinator

Rima Al Nahlawi
MS- Math HOD

Rihab Abdel Khalek
MS Principal
